

Value Added Benefits for KeyCare and BlueCare Plans

As an Association member, you receive special benefits and programs designed to bring even more value to your Anthem KeyCare or BlueCare plan. You can take advantage of:

Preventive care and wellness screenings at no charge

You don't have to wait to be sick or injured to make good use of your benefits. Because early detection is such a vital part of staying on top of your health, your plan includes coverage for the following preventive care screenings, all of which are covered at no cost to you when you visit network health care professionals:

- an annual checkup for members age 7 and older
- an annual gynecological exam and Pap test
- an annual mammogram for members age 35 and older
- colorectal cancer screenings*
- prostate exams and an annual Prostate Specific Antigen (PSA) test for men age 40 and over
- additional routine immunizations, labs and x-rays done in connection with an annual checkup

In addition, if your plan includes a deductible, any other services related to routine wellness that are received from an in-network provider will be covered regardless of whether the deductible has been met.

*If in the course of a colonoscopy screening procedure a polyp or other abnormality is identified, biopsied and/or removed, the service will be considered diagnostic and/or surgical, rather than a screening. This may result in a possible difference in your deductible (if any), copayment and/or coinsurance.

Supplemental accidental coverage

It's never easy dealing with an accident that leads to the emergency room. Your Anthem KeyCare or BlueCare plan will pay the first \$750 of covered outpatient services that are received. Once this amount has been reached, services will still be covered, but you will be responsible for paying your share of the cost as described in the enrollment material that accompanies this insert.

This insert is only one piece of your enrollment package. Exclusions, limitations and applicable policy numbers can be found in the enrollment brochure.
